

# ATLANTIS

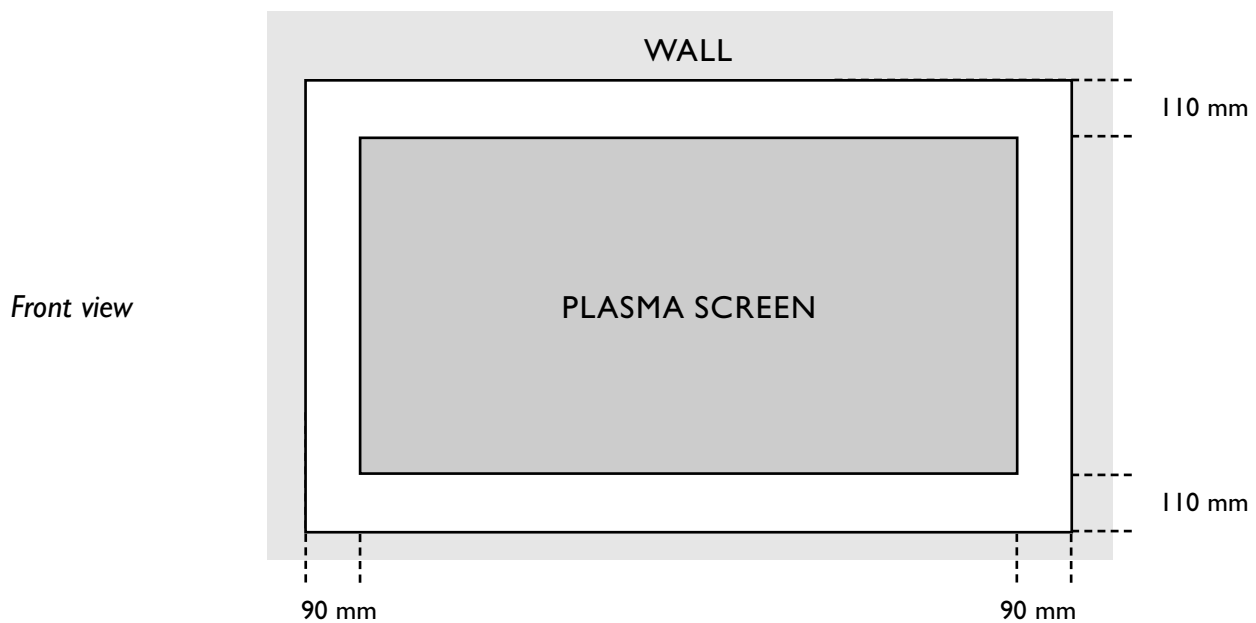

## RECESS DIMENSIONS FOR METAMORPHIC PICTURE FRAMES

### Width

Plasma width plus 180 mm (90 mm each side)

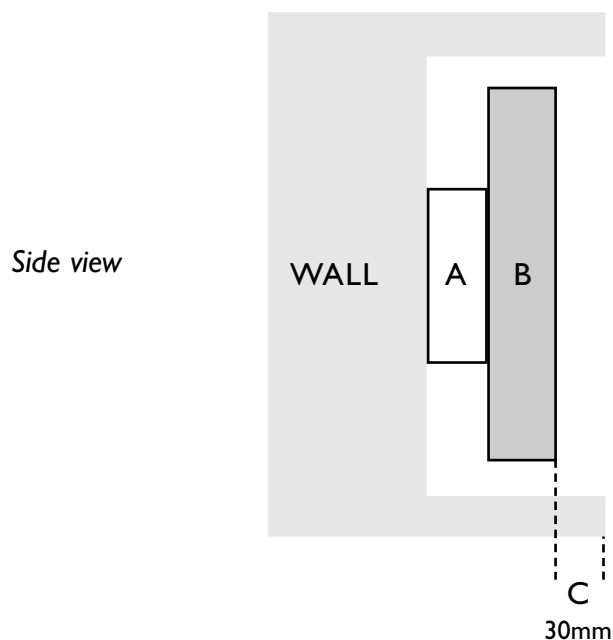

### Height

Plasma height plus 220 mm (110 mm each top and bottom)

### Depth

Bracket depth [A] + plasma depth [B] + 30 mm [C] = total depth of recess

The rear wall of the recess should be brick, breeze block, or at least 18 mm MDF.

The 'carcass' containing the roller mechanism fits around the plasma screen.

The decorative frame is fixed to the front of the carcass.
